consigli di posa

suggestions of installation . verlegehinweise . conseils pour la pose . grubość . рекомендации по укладке

STESURA DEL COLLANTE

- Assicurarsi che il fondo sia asciutto, pulito e perfettamente piano.
- Stendere in modo uniforme uno strato di adesivo per l'incollaggio del mosaico con l'ausilio di una spatola dentata.
- Far aderire al collante il mosaico faccia a vista facendo pressione con un tampone in gomma, assicurandosi che i fogli siano perfettamente allineati.
- Prima di passare alla stuccatura assicurarsi che il collante sia completamente indurito e asciutto.
- Le fughe si devono presentare perfettamente pulite, prive di residui di colla o di polvere e vuote per almeno 2/3 dello spessore del mosaico.

GLUE SPREADING

- Make sure that the surface to be tiled is relatively flat, free of debris, dirt and dust.
- Spread the adhesive evenly with the trowel's notched edge, combing it out in beaded ridges.
- Press each individual glass mosaic sheet firmly on the freshly applied adhesive and tap the sheets into place. The separation between the sheets should be the same as the one between mosaics.
- If adhesive oozes up between the mosaics, clean out the excess before it dries. Immediately wipe any adhesive from the face of the mosaics with a solvent-soaked sponge or rag.
- All joints should be perfectly clean, no adhesive residues, dust free and empty for at least 2/3 of the mosaics thickness.

AUSSTREICHEN DES KLEBSTOFFES

- Versichern Sie sich, daß der Untergrund trocken staubfettfrei und plan ist.
 - Tragen Sie mit Hilfe einer Zahnschachtel gleichmäßig eine Klebstoffschicht auf.
 - Kleben Sie die Mosaiksteine mit dem Gesicht nach oben auf und üben mit einem Gummipuffer etwas Druck aus. Achten Sie darauf, daß die Steine in einer Linie liegen.
 - Bevor Sie die Fugen austreichen sollte der Klebstoff völlig ausgehärtet und trocken sein.
 - Die Fugen müssen staubfrei und ohne Klebstoffrückstand, für mindestens 2/3 der Stärke der Mosaiksteine leer sein.
- ÉTENDRE L'ADHÉSIF

- Vérifiez que le fond soit sec, propre et parfaitement plat.
- À l'aide d'une truelle dentelée, étendez une couche uniforme d'adhésif pour pose de mosaïque.
- Faites adhérer la mosaïque par pression en utilisant un tampon en gomme, assurez-vous que les feuilles soient parfaitement alignées.

- Avant de sceller les fissures, assurez-vous que l'adhésif soit complètement dur et sec.
- Les joints doivent être parfaitement nettoyés, sans aucune trace de poussière ni résidus de colle et vides pour au moins 2/3 de l'épaisseur de la mosaïque.

NANOSZENIE KLEJU

- Upewnić się, że podłoże jest suche, czyste i perfekcyjnie wyrównane.
- Nanieść w sposób jednolity warstwę kleju do przyklejenia mozaiki używając szpachelki z grzebieniem.
- Ułożyć na kleju stroną odkrytą mozaikę dociskając ją gumowym tamponem, upewnić się, że folie są perfekcyjnie ułożone w linii.
- Przed przystąpieniem do zafugowania upewnić się czy klej stwardniał i wyschł.
- Fugi muszą być czyste, bez pozostałości po kleju lub pyłu i puste co najmniej na 2/3 mm grubości mozaiki.

НАНЕСЕНИЕ КЛЕЯ

- Проверить, чтобы основание было сухим, чистым и идеально ровным.
- Нанести равномерно слой клея для мозаики, используя зубчатый шпатель.
- Уложить на клей мозаику, лицевой стороной вверх, придавливая резиновым тампоном, отслеживая укладку листов по прямой линии.
- Перед переходом к затиранию швов, убедиться, что клей полностью затвердел и высох.
- Швы должны быть чистыми от пыли и пустыми минимум на 2/3.

STUCCATURA

- Applicare lo stucco nelle fughe, mediante spatola gommata eseguendo movimenti diagonali rispetto alla direzione delle fughe, asportando il prodotto in eccesso con la stessa spatola.

GROUTING

- Adhesives begin to set firmly in 20 to 30 minutes. For grouting, use a grout float at a slight angle and squeegee the grout mortar into the mosaics joints. Use a clean grout float to remove any excess grout from surface. Grout all joints. Allow up to 15 minutes for the grout to set and then proceed to wipe all residues with a sponge using diagonal movements.

AUSFUGUNG

- Bringen Sie den Stuck mittels einer Gummispachtel mit diagonalen Bewegungen zur Fuge ein und entfernen Sie den Überschuß.

SCELLAGE

- Appliquer l'enduit dans les joints à l'aide d'une spatule en gomme, par des mouvements diagonaux par rapport à la direction des joints; retirer le produit en excès.

FUGOWANIE

- Nanieść fugę przy pomocy gumowej szpachelki wykonując ruchy po przekątnej w stosunku do kierunku fugi, zbierając nadmiar produktu tą samą szpachelką.

ЗАТИРАНИЕ ШВОВ

- Заполнить швы затирочным материалом, используя резиновый шпатель и, совершая движения по диагонали, относительно направления шва, удаляя излишки затирки тем же шпателем.

PULIZIA E FINITURA

- La pulizia e la finitura della stuccatura deve essere effettuata quando il prodotto è ancora fresco e comunque nel più breve tempo possibile avendo cura di non svuotare i giunti e senza lasciare aloni sulla superficie del mosaico.
- Pulire la superficie con una spugna umida cambiando frequentemente l'acqua di lavaggio e infine asciugare con un panno.
- Non calpestare la superficie appena stuccata per evitare di sciupare la pavimentazione.

CLEANING AND FINISHING

- The cleaning and finishing operations of grouting must be carried out when the product is still fresh and as soon as possible, trying not to empty joints and without leaving any stain on the mosaic surface.
- Clean the surface with a wet sponge, frequently changing cleaning water, then rinse with a cloth.
- In order to avoid damage to the flooring, do not tread on the grouted surface.

REINIGUNG UND ENDBEHANDLUNG

- Die Reinigung und die Endbehandlung müssen unmittelbar nach der Verlegung, wenn das Produkt noch frisch ist, durchgeführt werden. Dann gilt es aber darauf zu achten, daß die Fugen nicht ausgewaschen werden und auf der Oberfläche des Mosaiks kein Restfugenmaterial anhaftet.
- Reinigen Sie die Oberfläche mit einem feuchten Schwamm und wechseln Sie dabei häufiger das Waschwasser, trocknen Sie mit einem Tuch nach.
- Die soeben verfugte Fläche möglichst nicht betreten, damit das Fugenbild nicht beschädigt wird.

NETTOYAGE ET FINITION

- Le nettoyage et la finition du scellage doivent être faits lorsque l'enduit est encore frais et dans le plus bref délai, prenez soin à ne pas vider les joints et à ne pas laisser des taches sur la surface de la mosaïque.
- Rincer la surface à l'aide d'une éponge humide en changeant souvent l'eau de nettoyage. Enfin, essuyez avec un chiffon.
- Éviter de marcher sur la surface fraîchement scellée pour ne pas abîmer le carrelage.

WYCZYSZCZENIE I WYKOŃCZENIE

- Umycie i wykończenie fugowania musi być przeprowadzone jeszcze jak produkt jest świeży, w każdym razie najszybciej jak to jest możliwe dbając, aby nie opróżnić szczelin i nie zostawić plam na powierzchni mozaiki.
- Umyć powierzchnię wilgotną gąbką często zmieniając wodę i na koniec wytrzeć suchą ściereczką.
- Nie chodzić po powierzchni świeżo zafugowanej, aby nie zniszczyć podłogi.

ОЧИСТКА

- Приступать к очистке, когда затирочный материал слегка схватился, заботясь, чтобы не удалять затирку из швов и не оставлять разводов на поверхности мозаики.
- Очищать поверхность влажной губкой, меняя часто воду для промывания губки, и затем просушить тряпкой.
- Не ходить по только что затертой поверхности, чтобы избежать повреждения.

LAVAGGIO INIZIALE

Prodotto: DETERDEK diluito in acqua 1:5
Dopo aver pulito bene e bagnato la superficie, distribuire uniformemente la soluzione 1:5 di DETERDEK e successivamente, aiutandosi con monospazzola munita di disco VERDE oppure spazzolone con straccio, pulire energicamente. (Quando l'operazione viene eseguita a mano con spazzolone, si raccomanda di sciacquare spesso lo straccio nella soluzione di lavaggio). Risciacquare accuratamente con acqua pulita, aiutandosi eventualmente con macchina aspiraliquidi.

MANUTENZIONE

Per la manutenzione ordinaria si consiglia il lavaggio con Fila Cleaner diluito 1:200 in acqua.
Non è necessario il risciacquo. Si può utilizzare anche con macchine lavasciuga a diluizioni superiori a 1:100. Per sporchi più intensi si consiglia il lavaggio con FILA PS/87 diluito 1:10 e poi risciacquare.

FIRST CLEANING

Product: DETERDEK diluted in water 1:5
After cleaning carefully and wetting the surface, spread uniformly the solution 1:5 of DETERDEK.
Clean forcefully using a single-disc professional cleaner with green disc or a cleaning brush. (If using a cleaning brush we recommend to rinse often the rag into the cleaning solution). Rinse thoroughly with clean water, using if possible a vacuum drier.

ROUTINE CLEANING

For routine care Fila recommends the use of Fila Cleaner diluted in water 1:200. Does not require rinsing. When diluted min. 1:100 can be used with a floor cleaning-machine. In case of more stubborn dirt, Fila recommends the use of Fila PS87 diluted 1:10, then rinse.

NETTOYAGE INITIAL

Produit: DETERDEK dilué 1:5
Après avoir bien nettoyé et mouillé la surface, appliquer uniformément le produit dilué et par la suite à l'aide d'une Monobrosse équipée du disque vert ou un, aspirateur à liquides nettoyer énergiquement.
Si on utilise un balai-brosse il est conseillé de bien rincer plusieurs fois le chiffon.
Bien rincer à l'eau propre en s'aidant par un aspirateur à liquides.

ENTRETIEN

Courant: nettoyage avec Fila Cleaner, dilution de 1 pour 200. Utilisable avec l'auto laveuse à haut degré de dilution à partir de 1/100 sans besoin de rincer.
Sautés importantes: diluer à 1:10 le produit PS87 et bien rincer.

GRUNDREINIGUNG

Produkt: DETERDEK verdünnt mit Wasser 1:5
Oberfläche mit Wasser reinigen und die Verdünnung DETERDEK 1:5 verteilen.
Danach mit einer Einscheibenmaschine mit grünem Pad

oder mit Schrubber und Lappen energisch bearbeiten (beim Gebrauch von Schrubber und Lappen wird empfohlen, den Lappen öfters in der Verdünnung auszuwaschen). Reichlich mit Wasser nachputzen mit Hilfe einem Flüssigkeitsauger.

PFLEGE

Zur regelmäßigen Pflege empfiehlt Fila die Verwendung von Fila Cleaner (verdünnt 1:200) in Verdünnungen ab 1:100 für den Einsatz mit Scheuersaugmaschinen geeignet. Bei sehr intensivem Schmutz empfiehlt Fila die Verwendung von Fila PS/87 verdünnt 1:10. Danach mit klarem Wasser putzen.

PIERWSZE MYCIE

Produkt: DETERDEK rozcieńczony z wodą 1:5.
Po starannym umyciu i nawilżeniu powierzchni, nanieść jednolicie roztwór 1:5 DETERDEK i następnie używać szczotki wyposażonej w dysk VERDE lub szczotki ze ściereczką, energicznie wycierać. (W przypadku, gdy czynność jest wykonywana ręcznie szczotką, zaleca się częste płukanie ściereczki w trakcie mycia). Umyć starannie powierzchnię czystą wodą, pomagając sobie ewentualnie maszyną zbierającą płyn.
